

Decoral[®] System

Imagine the possibilities...

Decorative Powder Coating

Introducing Decorative Power Coating by Decoral

Architects, builders, manufacturers & custom coaters all over the world are discovering the remarkable advantages of decorative coatings by Decoral System. Our sophisticated wood grain powder coating process applies decorative finishing deep into coated aluminum, steel, iron, glass, ceramic, plastic & other surfaces for windows, doors, blinds, fixtures furnishings, & virtually any other product where aesthetic appeal, durability & fire retardant advantages enhance its value. Decoral System powder coatings are available in an endless variety of patterns, colors, & textures.

With the Decoral process, aluminum & other materials can be designed to accurately resemble authentic wood grain, marble & stone finishes, plus floral patterns, animal prints, & even custom logo graphics. Offering long-lived protection and many other benefits, Decoral coatings are the ideal specification choice for architects & designers worldwide. With hundreds of durable finishes, Decoral offers an added-value advantage that will increase finishing options, as well as market share for manufacturers & custom coaters alike.

In 2004, The VIV Group introduced Decoral System USA Corp. to the United states. A leader in the production and distribution of powder coating finishes for the past 30 years, The VIV Group boasts more than 500 employees worldwide. Starting from its primary manufacturing facility in Verona, Italy, the company has grown to include more than 600 plants & distributors in over 60 countries. Over the years, Decoral has produced thousands of tons of decorated aluminum for diverse applications.

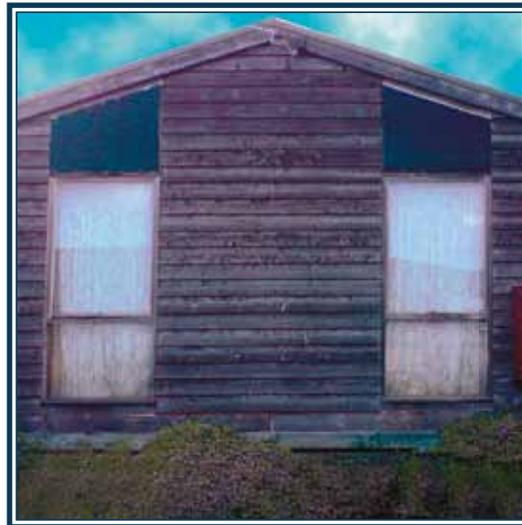

Decoral offers turn key plants with training, marketing tools, R&D and know-how with the necessary raw materials (powder coating and transfer films). Additionally, Decoral provides its decorative powder coating service through its network of Decoral licensed applicators worldwide.

ADVANTAGES of DECORAL vs REAL WOOD

High UV resistance; Water and humidity proof; Fire retardant; High corrosion resistance; No maintenance required; High scratch resistance; Does not swell, rot or warp; Less costly than wood; Metal is easier to fabricate; Termite and insect proof.

DISADVANTAGES of REAL WOOD

Poor UV durability; Very sensitive to humidity; High flammability; Needs regular maintenance; Easy to scratch; Easily swells, rots and warps; More costly than metal; Difficult to fabricate; Vulnerable to termites and insects.

DECORAL VS FOIL LAMINATION

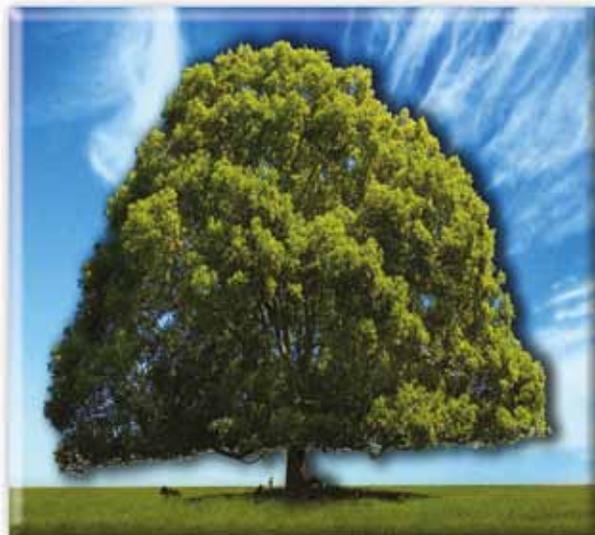

- Decoral is UV resistant and water/humidity proof.
 - Decoral is less expensive.
 - Decoral will not delaminate.
 - Decoral is easier to manufacture.
 - Decoral machine requires less space.
 - Decoral process is automated.
 - Decoral offers a huge variety of patterns.
 - Decoral raw materials are eco-friendly (recyclable).
 - Decoral is fire retardant and anti-graffiti.
 - Decoral can be applied on most 3D metal shapes.
-
- Lamination is susceptible to UV & water/humidity.
 - Lamination is more expensive.
 - Lamination can separate easily.
 - Lamination is difficult to manufacture.
 - Lamination machinery requires many adjustments.
 - Lamination requires a lot of time/labor to apply.
 - Lamination process has a lot of waste.
 - Lamination uses toxic glues.
 - Lamination uses films which are not recyclable.
 - Lamination is not fire retardant.
 - Lamination is not anti-graffiti.
 - Lamination cannot be applied on 3D parts.

DECORAL
is GREEN and SUSTAINABLE

- Does not emit VOC's
- Powders are TGIC free
- Does not use harmful solvents
- Avoids cutting trees
- Uses recycled materials
- Avoids digging marble mines
- Does not pollute
- Metal lasts longer than wood
- Metal can be recycled

The
United
States
of
America

The Director of the United States Patent and Trademark Office

Has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.

Therefore, this

United States Patent

Grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America for the term set forth below, subject to the payment of maintenance fees as provided by law.

If this application was filed prior to June 8, 1995, the term of this patent is the longer of seventeen years from the date of grant of this patent or twenty years from the earliest effective U.S. filing date of the application, subject to any statutory extension.

If this application was filed on or after June 8, 1995, the term of this patent is twenty years from the U.S. filing date, subject to any statutory extension. If the application contains a specific reference to an earlier filed application or applications under 35 U.S.C. 120, 121 or 365(c), the term of the patent is twenty years from the date on which the earliest application was filed, subject to any statutory extensions.
